Chiave fissa 8/16 mm  
Fix key 8/16 mm

## Informazioni tecniche | Technical informations

### Vantaggi del sistema | plus of the system

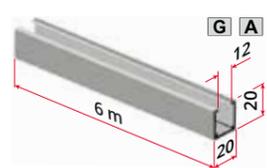

Il sistema offre numerosi vantaggi tecnici fra cui:

- Unica versione ambidestra con libertà di posizionamento dei fulcri di rotazione in fase di installazione
- Sistema applicabile sia su porte in legno che su profili di alluminio
- Basso attrito di rotazione (su sfera) che ne rende agevole l'utilizzo
- Possibilità di utilizzare un blocco di posizione opzionale a molla, per trattenere la porta in ogni posizione desiderata
- Estrema facilità di montaggio
- Compatibilità coi nostri sistemi scorrevoli che usano lo stesso profilo 2441

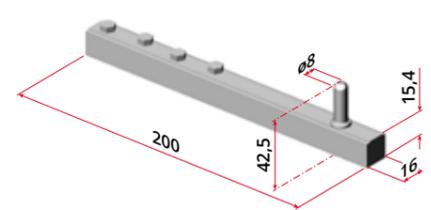

The system offers numerous technical advantages including:

- Possibility of adjusting the rotation fulcrums with unique ambidextrous version
- System applicable on both wooden doors and aluminum profile doors
- Low rotation friction (on sphere) which makes it easy to use
- Possibility of using a spring lock to hold the door in any desired position
- Extremely easy to assemble
- Compatibility with our systems sliding systems that use the same profile 2441

Serie 6500

## Dimensionamento della porta e posizionamento del fulcro di rotazione

### Door sizing and positioning of the rotation fulcrum

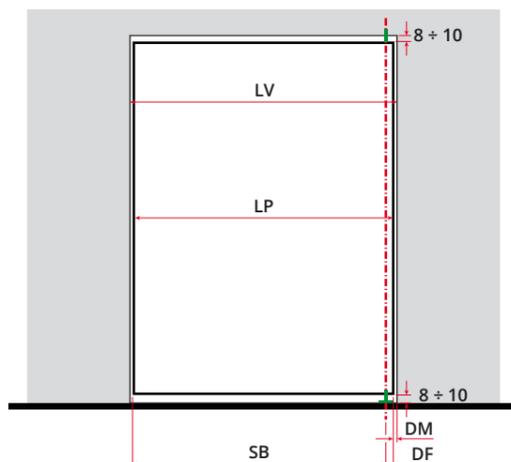

E' possibile regolare l'asse di rotazione della porta da un minimo di 25mm (A) di distanza dal muro fino ad un massimo corrispondente al centro della porta stessa (B)

It is possible to adjust the axis of rotation of the door from a minimum distance of 25 mm (A) from the wall, up to a maximum equal to the centre of the door itself (B).

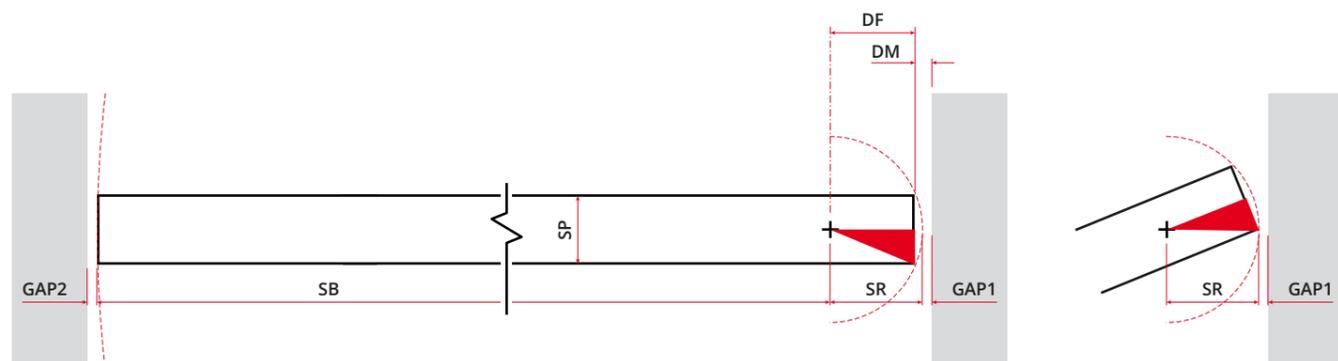

Kit compatibili  
Matching kits

6540 - 6545

- DF\*\* min = 25
- SB max = 1600
- LP = LV - DM - GAP1 - GAP2
- DM\* = SR - DF + GAP1
- SR =  $\sqrt{DF^2 + (SP/2)^2}$

#### LEGENDA

LP = Larghezza porta   Door width	DF** = Distanza fulcro   Fulcrum distance	SB = Sbalzo   Overhang
LV = Larghezza vano   Doorway width	SR = Spazio di rotazione   Rotation space	
SP = Spessore porta   Door thickness	DM* = Distanza dal muro   Distance from the wall	

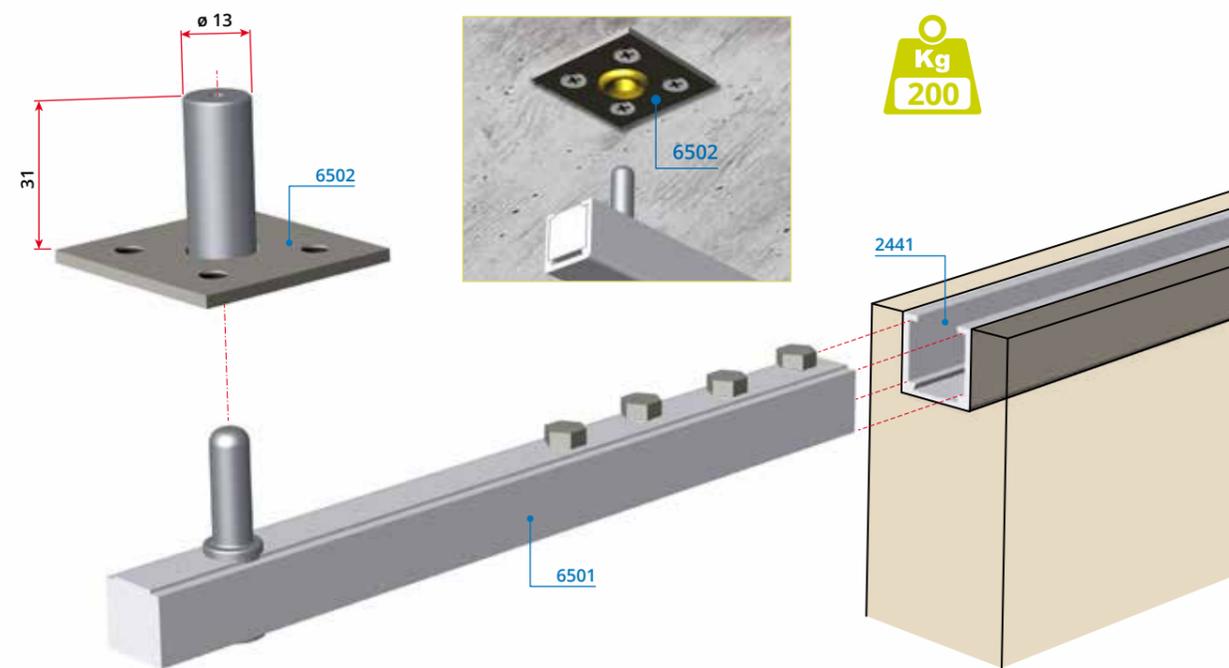

\* DM è lo spazio da lasciare fra la porta e il muro per consentire la rotazione senza interferenza. Questa quota variabile dipende dallo spessore della porta e può essere calcolata secondo la formula matematica espressa nel disegno o analizzando il relativo schema. All'aumentare della distanza del fulcro (DF) la distanza dal muro (DM) diminuisce.

\*\* Il sistema è calcolato per porte fino a 200 kg applicati nel loro baricentro. Più la porta è pesante e larga più è conveniente spostare il fulcro verso l'interno andando quindi ad aumentare la quota di DF, che ricordiamo può essere minimo di 25 mm, e massimo al centro della porta.

\* DM is the space to be left between the door and the wall to allow it to rotate. This variable dimension depends on the thickness of the door and can be calculated according to the mathematical formula expressed in the drawing or by analyzing the relative scheme. As the distance from the fulcrum (DF) increases the distance from the wall (DM) decreases.

\*\* The system is calculated for doors up to 200 kg applied in their center of gravity. The heavier and wider the door is, the more convenient it is to move the fulcrum inwards, thus increasing the height of DF, which can be a minimum of 25 mm, and maximum in the center of the door.

# Istruzioni montaggio | Assembly instructions

## Montaggio cardini e porta | Hinges and door assembly

**1**

Fissare i 2 profili 2441 nelle sedi predisposte sulla parte superiore ed inferiore della porta (solo per porte in legno)

*Fasten the 2 profiles 2441 on the upper and lower door slots (only for wooden doors)*

**2**

Fissare il cardine superiore (art.6502) e quello inferiore (art. 6504) rispetto al fulcro di rotazione della porta desiderato

*Fix the upper hinge (art. 6502) and lower hinge (art. 6504) with respect to the desired fulcrum of rotation of the door*

Forare  $\varnothing 13$  il soffitto, dopodichè fissare il cardine superiore

*Drill a  $\varnothing 13$  hole in the ceiling, then fix the upper hinge*

Predisporre il cardine inferiore inserendo la sfera nella sua sede

*Prepare the lower hinge by inserting the ball into its seat*

**3**

Inserire parzialmente la sola slitta del cardine superiore (art. 6501) nel profilo 2441 superiore, lasciando le 4 viti di fissaggio allentate

*Partially insert only the upper hinge slide (art. 6501) in the upper profile 2441, leaving the 4 fixing screws loose.*

**4** Montaggio cardine inferiore tramite l'utilizzo dei rullini di montaggio (Kit 6530 opzionale)  
Lower hinge assembly using the mounting rollers (Kit 6530 optional)

**art 6500/8**  
Distanza porta/pavimento 8 mm  
Door/floor distance 8 mm

**art 6500/10**  
Distanza porta/pavimento 10 mm  
Door/floor distance 10 mm

**4A** Calzare la slitta del art 6503 nel cardine inferiore

**4B** Inserire la relativa bussola senza utilizzare il distanziale in dotazione, per ottenere una distanza porta/pavimento di 8 mm

**4C** Avvicinare la porta e inserire la slitta art 6503 all'interno del profilo 2441

**4A** Calzare la slitta del art 6503 nel cardine inferiore  
*Insert the slide of art. 6503 in the lower hinge*

**4B** Inserire la relativa bussola senza utilizzare il distanziale in dotazione, per ottenere una distanza porta/pavimento di 8 mm  
*Insert the relative bush without using the supplied spacer, to obtain a door / floor distance of 8 mm*

**4C** Avvicinare la porta e inserire la slitta art 6503 all'interno del profilo 2441  
*Bring the door closer and insert the 6503 slide inside the 2441 profile*

**4A** Calzare la slitta del art 6503 nel cardine inferiore

**4B** Inserire la relativa bussola utilizzando il distanziale in dotazione, per ottenere una distanza porta/pavimento di 10 mm

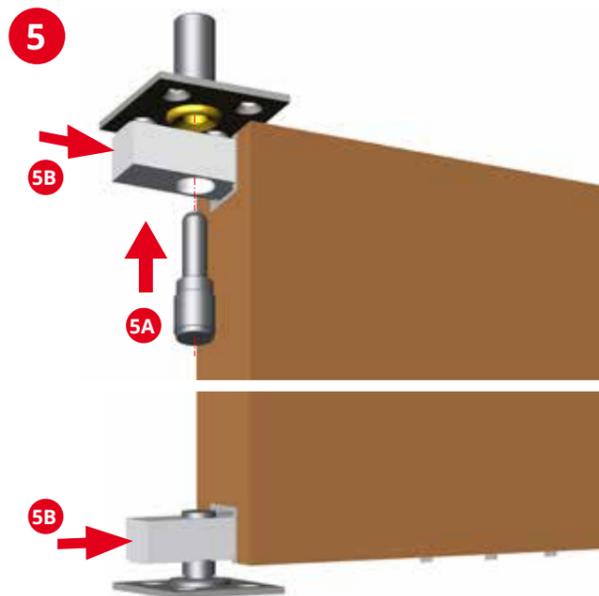

**4C** Avvicinare la porta e inserire la slitta art 6503 all'interno del profilo 2441

**4A** Calzare la slitta del art 6503 nel cardine inferiore  
*Insert the slide of art. 6503 in the lower hinge*

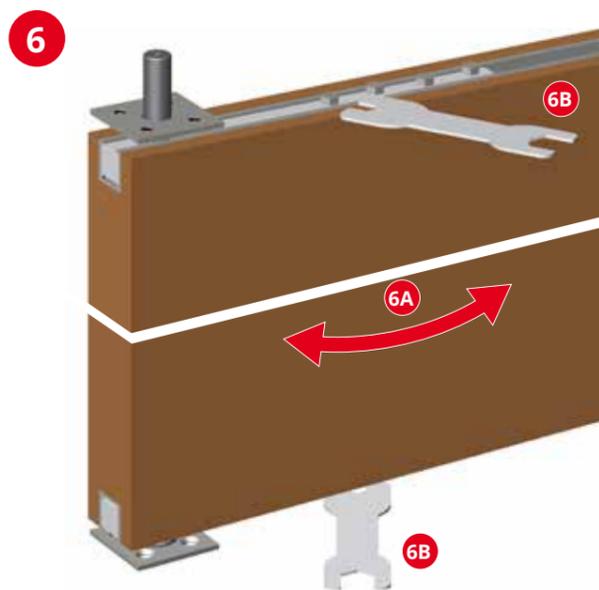

**4B** Inserire la relativa bussola utilizzando il distanziale in dotazione, per ottenere una distanza porta/pavimento di 10 mm  
*Insert the relative bush using the supplied spacer, to obtain a door / floor distance of 10 mm*

**4C** Avvicinare la porta e inserire la slitta art 6503 all'interno del profilo 2441  
*Bring the door closer and insert the 6503 slide inside the 2441 profile*

Serie 6500

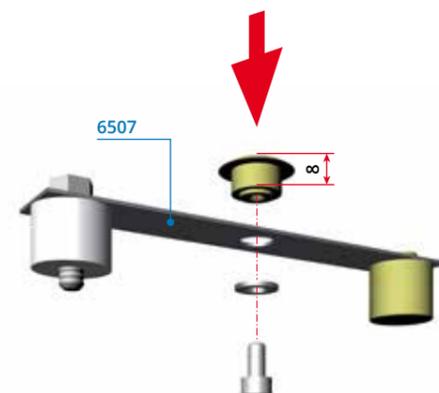

- 5A Inserire il perno nella slitta superiore  
*Insert the pin into the upper slide*
- 5B Proseguire l'avvicinamento della porta fino alla posizione approssimativa desiderata del fulcro di rotazione  
*Continue approaching the door to the approximate desired position of the fulcrum*

- 6A Regolare il parallelismo/perpendicolarità della porta, spostando le slitte all'interno del profilo 2441  
*Adjust the parallelism/perpendicularity of the door moving the slides inside the 2441 profile*
- 6B Serrare le 4 viti di ogni slitta per fissare la corretta posizione  
*Tight the 4 screws of each slide to fix the right position*

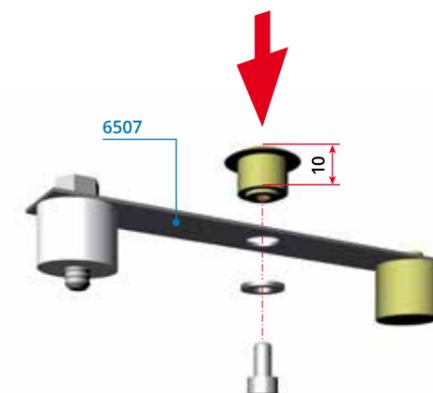

2

Distanza porta/soffitto 8 mm  
*Door/ceiling distance 8 mm*

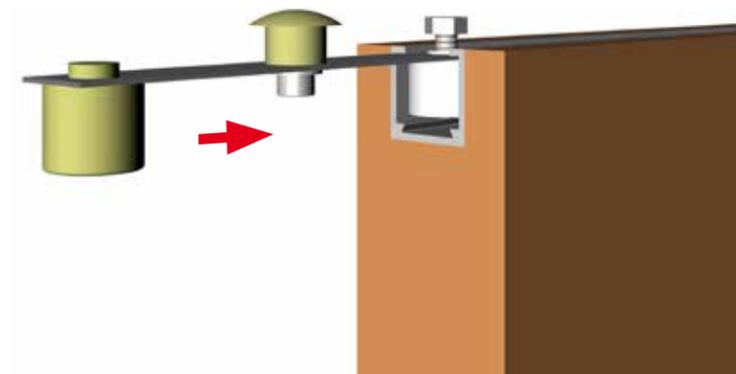

Montare il puntale più basso (8 mm) in dotazione  
*Fit the lower tip (8 mm) supplied*

Distanza porta/soffitto 10 mm  
*Door/ceiling distance 10 mm*

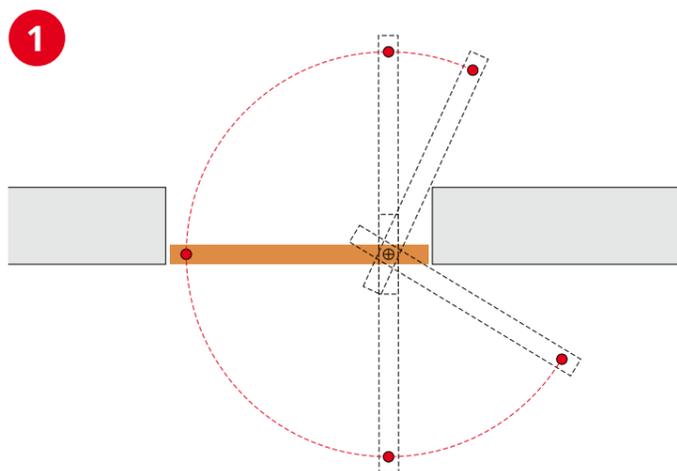

Montare il puntale più alto (10 mm) in dotazione  
*Mount the highest tip (10 mm) supplied*

3

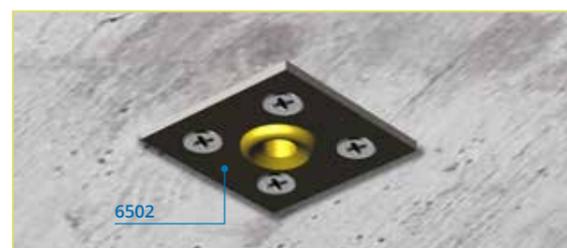

Inserire il blocco completo 6507 nel binario 2441  
*Insert complete block 6507 into rail 2441*

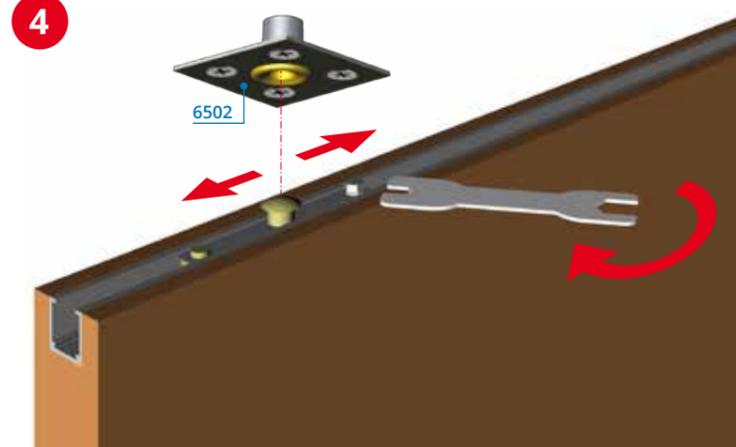

Montaggio blocco opzionale art 6507 | *Optional block assembly art 6507*

Scegliere le posizioni di trattenimento in chiusura e/o in apertura, dopodichè fissare la boccia 6502 (al soffitto o al pavimento)  
*Choose the locking positions in closing and/or opening positions and secure the bushing 6502 (to ceiling or floor)*

4

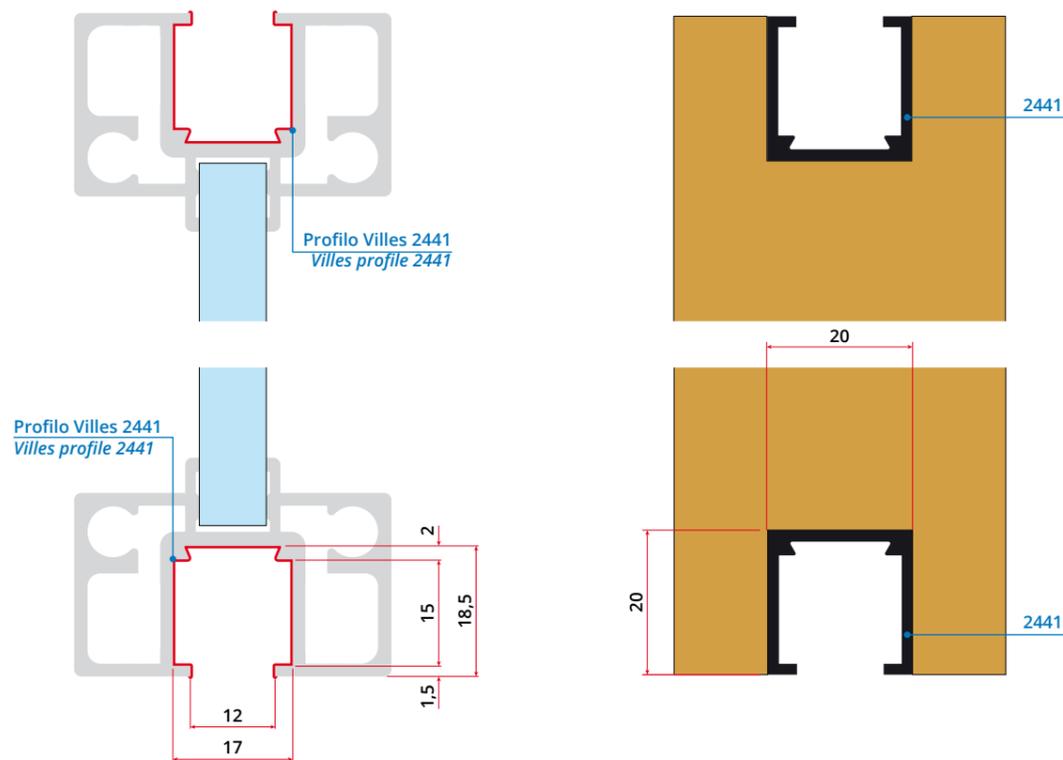

Una volta trovata la perfetta corrispondenza con la boccia di riscontro 6502, bloccarlo tramite la vite di fissaggio  
*Once the perfect correspondence with the 6502, secure it with the fixing screw*

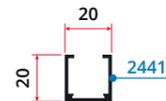

## Varianti e optional | Variants and optionals

Possibilità di integrare il profilo Villes all'interno di telai proprietari  
 Possibility of integrating the Villes profile into own frames

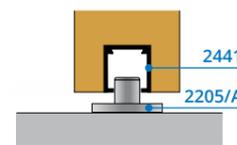

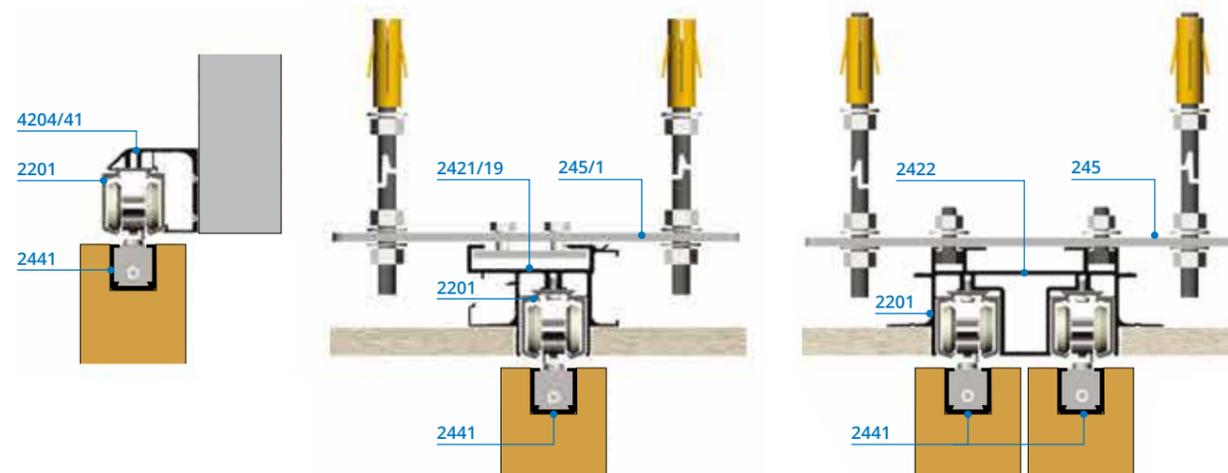

Offriamo la possibilità di integrare il disegno del nostro profilo villes 2441 all'interno di un vostro telaio in alluminio, in modo da mantenere le stesse caratteristiche sia per porte in legno che in vetro intelaiate  
 We offer the possibility to integrate the design of our villes 2441 profile into your aluminum frame, to maintain the same characteristics for both wooden and glass framed doors

## Compatibilità totale delle porte tra i sistemi a bilico e scorrevoli Full door compatibility between pivoting and sliding systems

Tutte le porte predisposte per il nostro sistema a bilico 6500 possono essere utilizzate anche come porte scorrevoli tramite gli accessori della serie 2200 senza apportare nessuna modifica

All doors designed for our 6500 pivoting system can also be used as sliding doors with the accessories of the 2200 series without making any modifications

**Istruzioni montaggio | Assembly instructions**

**Montaggio cardini e porta | Hinges and door assembly**

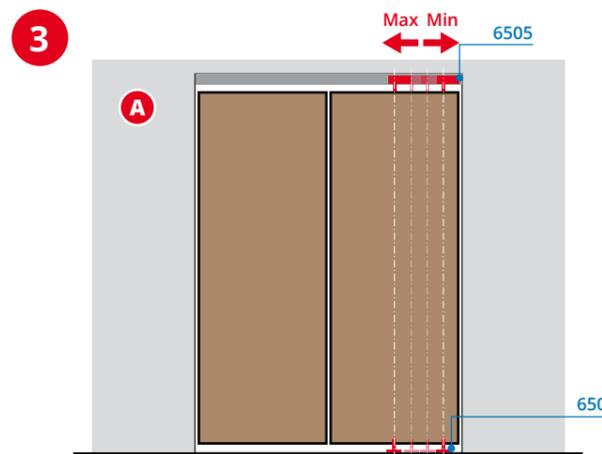

Fissare i profili 2441 nelle sedi predisposte sulla parte superiore ed inferiore delle porte (solo per porte in legno)

*Fasten the profiles 2441 on the upper and lower doors slots (only for wooden doors)*

Inserire nel binario 2201 i carrelli (art 5666/S e/o 2544/S) con le relative slitte e l'inserto cardine superiore (art 6505). Successivamente fissare il binario al soffitto

*Insert the carriages (art 5666/S and/or 2544/S) with the relative slides and the upper hinge insert (art 6505) into the track 2201. Then fix the track to the ceiling*

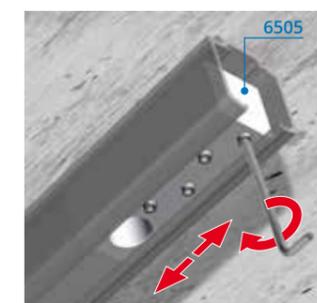

Fissare al pavimento il cardine inferiore (art 6504) e fissare nel binario quello superiore (art 6505) rispetto al fulcro di rotazione della porta desiderato

*Fix the lower hinge (art 6504) to the floor and fix the upper hinge (art 6505) with respect to the desired fulcrum of rotation of the door*

Predisporre il cardine inferiore inserendo la sfera nella sua sede

*Prepare the lower hinge by inserting the ball into its seat*

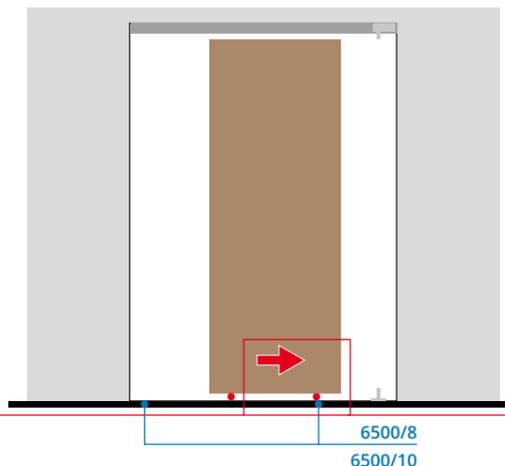

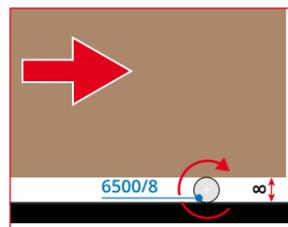

Posizionare l'inserto bussola superiore art 6505 e poi serrare i grani

*Position the socket insert art 6505 and then tighten the no-haed screws*

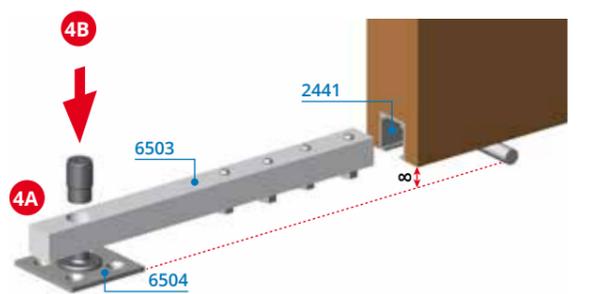

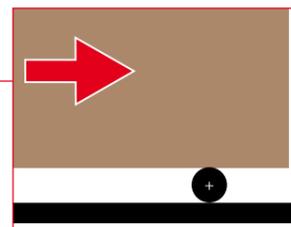

Serie 6500

**4** Montaggio cardine inferiore tramite l'utilizzo dei rullini di montaggio  
*Lower hinge assembly using the mounting rollers*

**art 6500/8**  
 Distanza porta/pavimento  
 8 mm  
*Door/floor distance*

**4A** Calzare la slitta del art 6503 nel cardine inferiore  
*Insert the slide of art. 6503 in the lower hinge*

**4B** Inserire la relativa bussola senza utilizzare il distanziale in dotazione, per ottenere una distanza porta/pavimento di 8 mm  
*Insert the relative bush without using the supplied spacer, to obtain a door / floor distance of 8 mm*

**4C** Avvicinare la porta e inserire la slitta art 6503 all'interno del profilo 2441  
*Bring the door closer and insert the 6503 slide inside the 2441 profile*

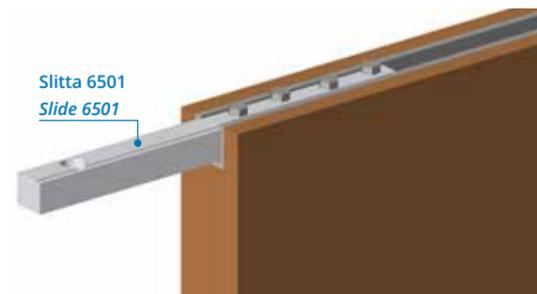

**4A** Calzare la slitta del art 6503 nel cardine inferiore  
*Insert the slide of art. 6503 in the lower hinge*

**4B** Inserire la relativa bussola utilizzando il distanziale in dotazione, per ottenere una distanza porta/pavimento di 10 mm  
*Insert the relative bush using the supplied spacer, to obtain a door / floor distance of 10 mm*

**4C** Avvicinare la porta e inserire la slitta art 6503 all'interno del profilo 2441  
*Bring the door closer and insert the 6503 slide inside the 2441 profile*

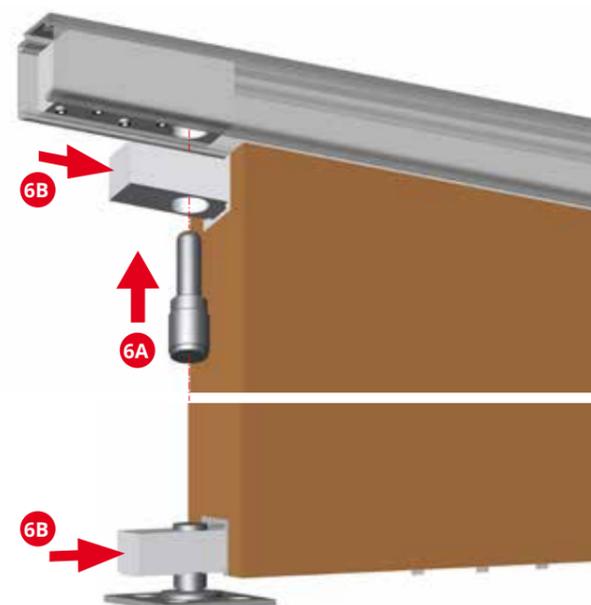

**5**

Inserire parzialmente la sola slitta del cardine superiore (art 6501) nel profilo 2441 superiore, lasciando le 4 viti di fissaggio allentate

*Partially insert only the upper hinge slide (art 6501) in the upper profile 2441, leaving the 4 fixing screws loose.*

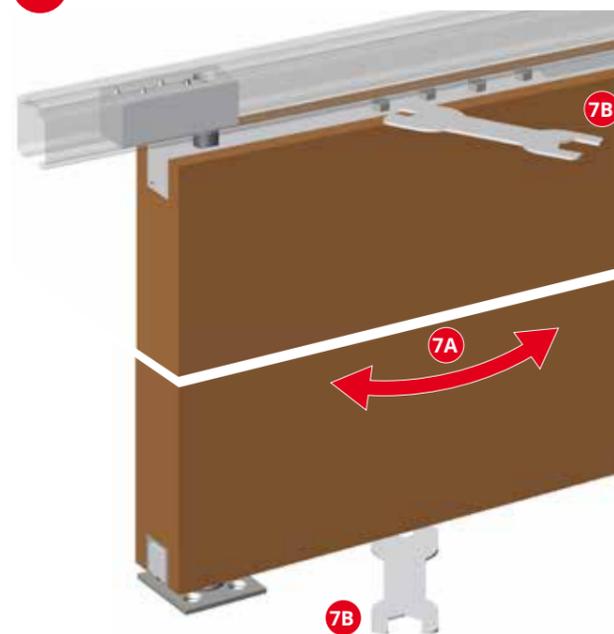

**6**

**6A** Inserire il perno nella slitta superiore  
*Insert the pin into the upper slide*

**6B** Proseguire l'avvicinamento della porta fino alla posizione approssimativa desiderata del fulcro di rotazione  
*Continue approaching the door to the approximate desired position of the fulcrum*

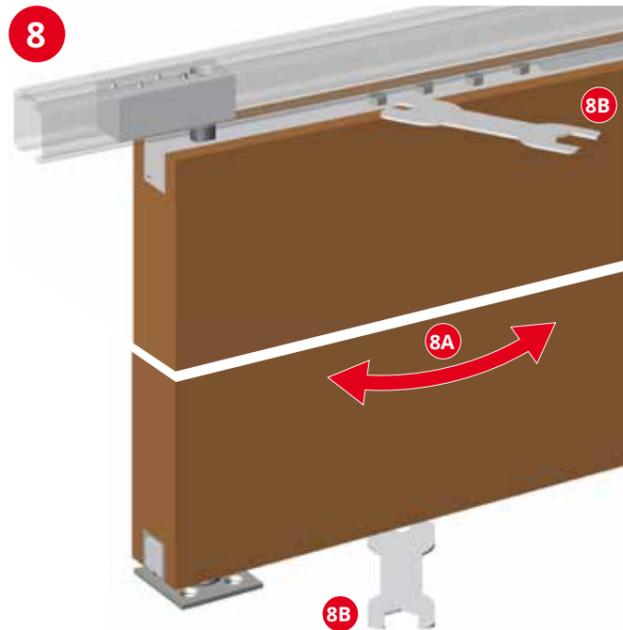

**7**

**7A** Regolare il parallelismo/perpendicolarità della porta, spostando le slitte all'interno del profilo del 2441  
*Adjust the parallelism/perpendicularity of the door moving the slides inside the 2441 profile*

**7B** Serrare le 4 viti di ogni slitta per fissare la corretta posizione  
*Tight the 4 screws of each slide to fix the right position*

Serie 6500

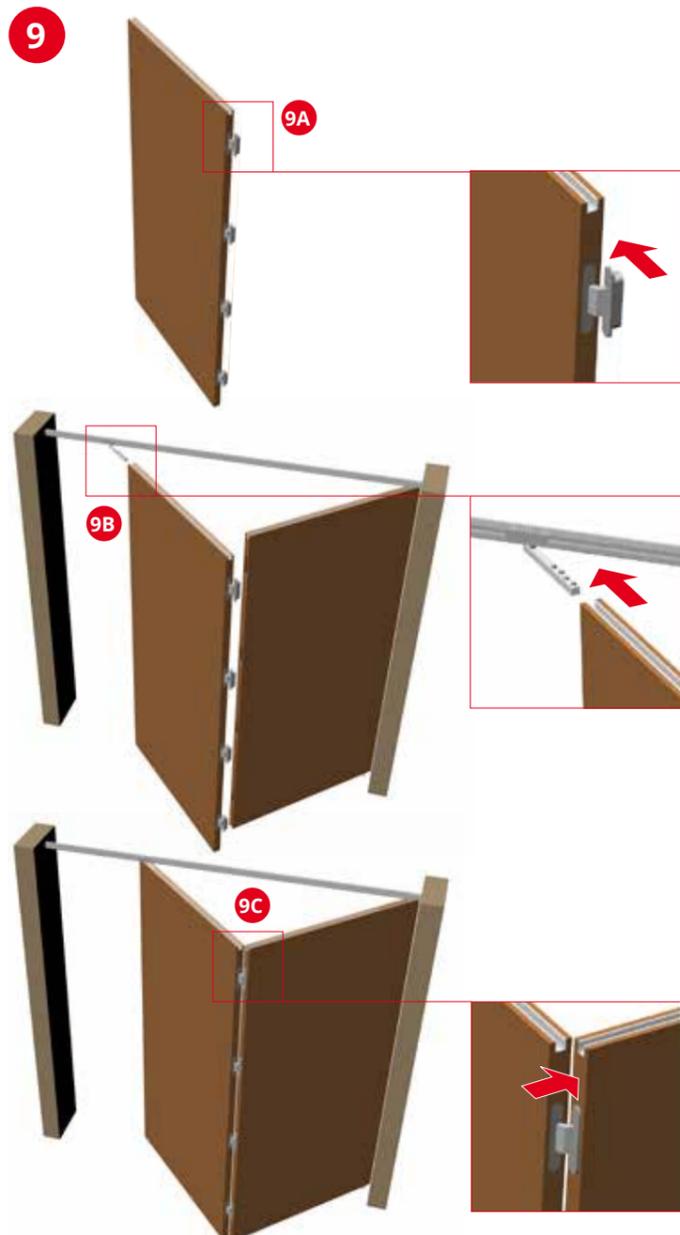

**8A** Regolare il parallelismo/perpendicolarità della porta, spostando le slitte all'interno del profilo 2441

*Adjust the parallelism/perpendicularity of the door moving the slides inside the 2441 profile*

**8B** Serrare le 4 viti di ogni slitta per fissare la corretta posizione

*Tight the 4 screws of each slide to fix the right position*

Una volta fissata e regolata la prima anta ai cardini procedere con il montaggio della seconda anta come segue

*Once the first leaf has been fixed and adjusted to the hinges, proceed with the assembly of the second leaf as follows*

**9A** Montare le cerniere sulla seconda anta

*Mount the hinges on the second door*

**9B** Inserire la slitta col carrello nella seconda anta

*Insert the slide with the trolley in the second leaf*

**9C** A questo punto fissare le cerniere anche alla prima anta unendo le due porte

*At this point, fasten the hinges to the first leaf as well, joining the two doors*

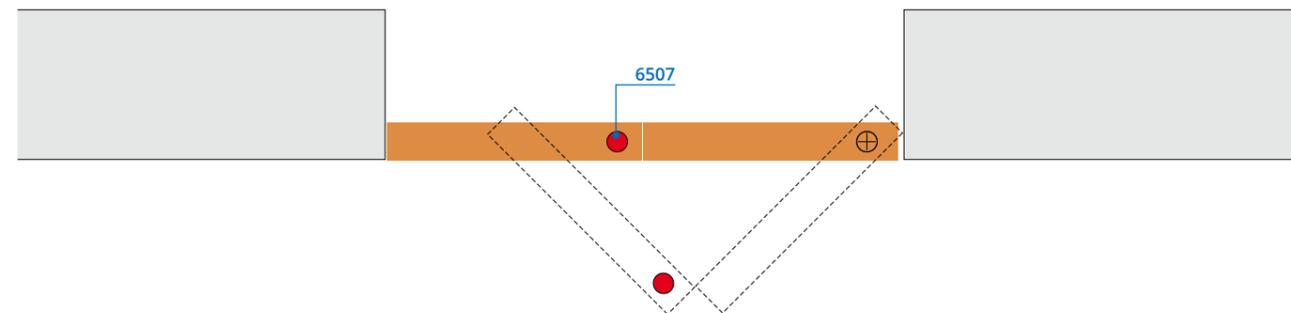

In presenza di più ante ripetere queste operazioni per ognuna di esse

*In the presence of more leaves, repeat these operations for each of them*

## Montaggio blocco opzionale art 6507 | Optional block assembly art 6507

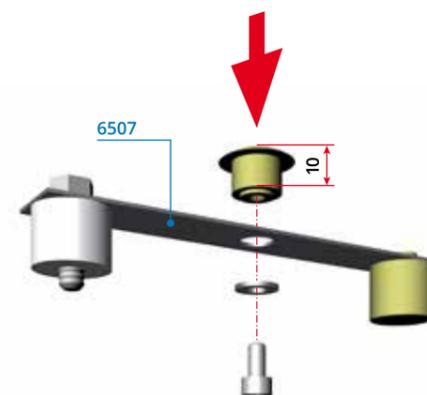

**1**

Il blocco opzionale art 6507 è compatibile con il binario 2201 il quale può essere sia incassato che esterno. E' consigliato posizionare il blocco al centro della porta per assicurare un migliore allineamento in chiusura. *The optional block art. 6507 is compatible with the 2201 track which can be both recessed and external. It is recommended to place the block in the center of the door to ensure better alignment in closing*

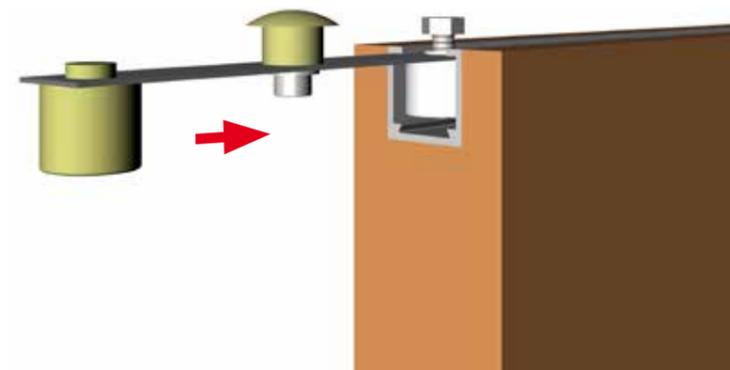

**2**

**Distanza porta/binario 10 mm**  
*Door/rail distance 10 mm*

Montare il puntale più alto (10 mm) in dotazione  
*Mount the highest tip (10 mm) supplied*

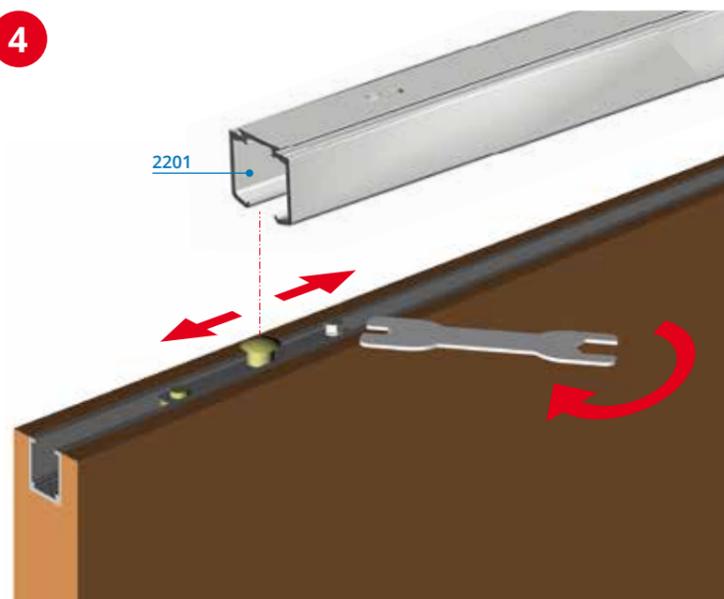

**3**

Inserire il blocco completo 6507 nel binario 2441  
*Insert complete block 6507 into rail 2441*

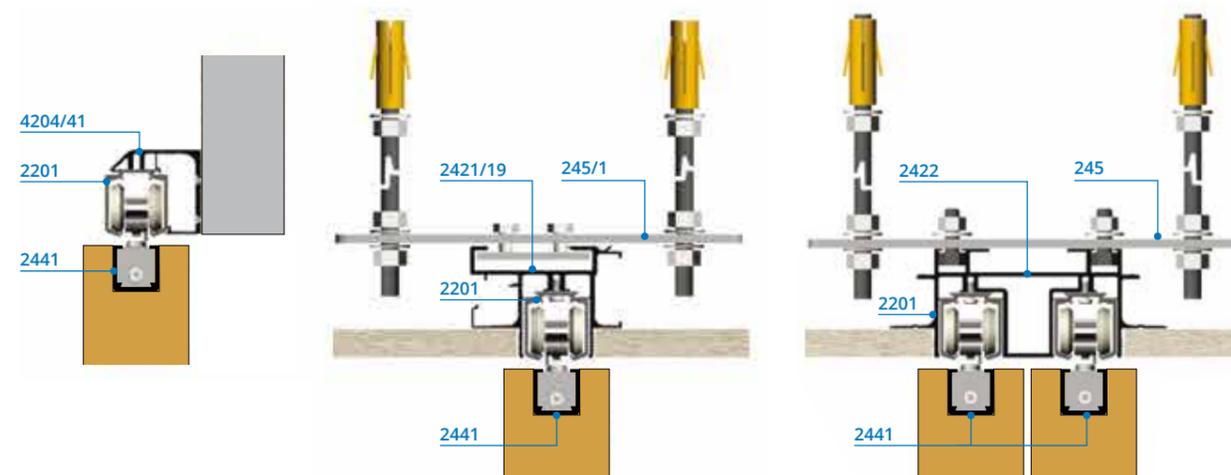

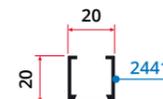

4

Posizionare l'art. 6507 verso il centro della porta e bloccarlo tramite la vite di fissaggio  
 Position the art. 6507 towards the center of the door and lock it with the fixing screw
